BIN

PRODUCT APPLICATION BULLETIN

**Model SPWT-21
Small Impact
Electric Vibrator**

Technical Specifications

- 3200 VPM at Single Phase
- 20 lbs. of force
- 115 Volts (230 Available)
- 45 dB on A-Scale at 1 meter

PROBLEM

A customer was having problems with dust sticking to sides of bin, all the way down to discharge rotary valve. The bin would have to be cleaned and the product removed from sides of bin. This caused shutdowns in production and was very laborious for employees.

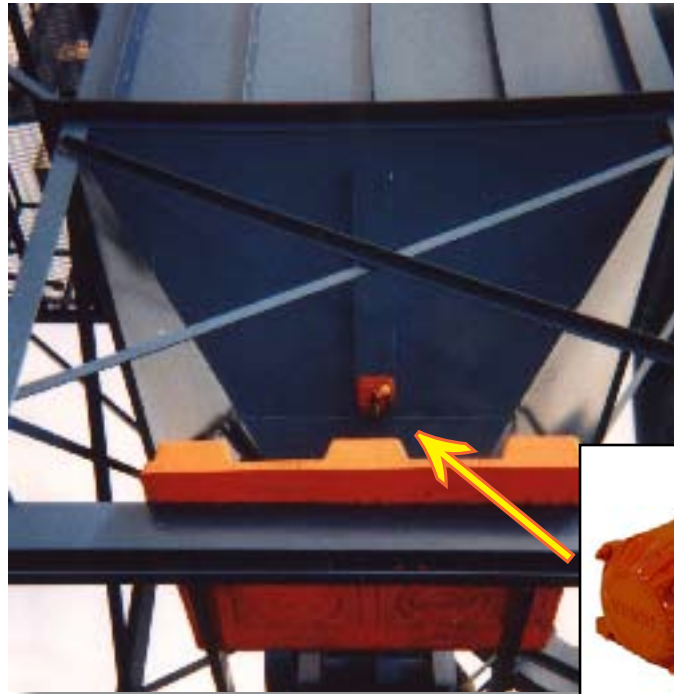

SOLUTION

Installing two VIBCO SPWT-21 Small Impact Electric Vibrators on both side of bin. The vibrators worked as needed and the dust flowed to the rotary valve when in service. Material now flows freely to rotary valve and there has been an increase in production and a reduction in labor cost.

BENEFITS

After installing VIBCO Model SPWT-21 Small Impact Electric Vibrator the customer received the following benefits:

- Increased material flow
- Increased production rate
- No more lost man hours on cleaning bin
